

2011 California Walnut Acreage Report

Cooperating with the California Department of Food and Agriculture

California Field Office · P.O. Box 1258 · Sacramento, CA 95812 · (916) 498-5161 · (916) 498-5186 Fax · www.nass.usda.gov/ca

Released: May 24, 2012, 12:00 p.m. PDT

RESULTS

California's 2011 walnut acreage is estimated at 280,000 acres, up 10 percent from 2009. Of the total acreage, 245,000 were bearing and 35,000 were non-bearing.

WALNUT BEARING AND NON-BEARING ACREAGE 1/

Year 2/	Bearing	Non-Bearing	Total
2004	214,000	N/A	N/A
2005	215,000	26,000	241,000
2006	216,000	N/A	N/A
2007	218,000	25,000	243,000
2008	223,000	N/A	N/A
2009	227,000	28,000	255,000
2010	237,000	N/A	N/A
2011	245,000	35,000	280,000

1/ Reported data with an allowance for incompleteness.

2/ Beginning with 2003, acreage survey conducted every other year.

Of the walnut acreage reported, Chandler continues to be the leading variety with 79,022 bearing acres, followed by Hartley with 36,535 bearing acres. Chandler also accounted for 63 percent of the non-bearing acreage.

San Joaquin County continues to show the largest acreage planted with 14 percent of the total, followed by Butte with 12 percent and Tulare with 11 percent each.

OBJECTIVES

The California Field Office of the USDA's National Agricultural Statistics Service (NASS) conducts an acreage survey of California walnut growers. The purpose of this survey is to provide walnut acreage information on new plantings and removals. It is a continuation of a long series of industry-funded walnut acreage surveys.

Users are cautioned that this report consists of two parts:

- Estimated walnut acreage -- bearing, non-bearing, and total.
- Detailed data by variety, year planted, and county -- as voluntarily reported by walnut growers and maintained in the NASS database.

With perfect information, the estimated walnut acreage and the detailed data would be the same. However, differences exist for the following reasons:

- A voluntary survey of approximately 4,800 walnut growers is unlikely to ever attain 100 percent completeness.
- It is difficult for USDA, NASS to detect growers that are planting walnuts for the first time.
- The detailed data reflects tree removals from nearly 6,100 acres during the past two years. Of this number, some acreage was harvested in 2011 prior to being pulled out, and that acreage has already been removed from the detailed data.

PROCEDURES

The major source of the walnut detailed data was a questionnaire mailed to all walnut growers included in the NASS database. The mailing was made to approximately 4,800 walnut growers. The questionnaire contained previously reported crop, variety, and acreage information preprinted. Producers were asked to update the information with new plantings, removals, and any other corrections; new growers were mailed a blank questionnaire. Growers were given six weeks to respond by mail. A telephone follow-up was then undertaken. Field personnel personally visited large growers who did not respond by mail or telephone.

To arrive at the estimated walnut acreage, the NASS walnut acreage database was compared with pesticide application data maintained by County Agricultural Commissioners and the California Department of Pesticide Regulation.

ACKNOWLEDGMENTS

The USDA, NASS, California Field Office sincerely appreciates the many farm operators, owners, and management firms providing the information. A special thanks is due to the California Walnut Board for providing funding and support of this special acreage update survey.
