

# 2025 STANDING ACREAGE AS OF APRIL 30, 2025

In cooperation with the California Walnut Board

For Release: June 2, 2025

## RESULTS

The California Walnut Board (CWB) has commissioned Land IQ to develop an in-season, statewide walnut acreage assessment. As a part of this, acreage as of April 30, 2025 is provided in June, and the final acreage, as of August 31, 2025 is provided in November.

This report includes preliminary bearing acreage for the 2025 production year (September 1, 2024 - August 31, 2025), as well as a partial account of removed orchards. Removed orchards have been determined through spatial analysis as of April 30, 2025. Orchards that were identified as stressed or abandoned in the 2024 acreage assessment are included in the bearing, standing acreage but not included in the producing, standing acreage.

As a result, acreage statistics as of April 30, 2025 are:

|                                              |                |
|----------------------------------------------|----------------|
| 2024 Standing Bearing Acreage:               | 379,854        |
| New Acres Coming into Production:            | +8,538         |
| Removed Acres (9/1/24-4/30/25):              | (7,486)        |
| Removed Acres (5/1/25-8/30/25):              | TBD            |
| 2025 Standing Bearing Acreage:               | 381,472        |
| 2024 High Stress/Abandoned Acreage Standing: | (7,417)        |
| <b>2025 Producing Standing Acreage:</b>      | <b>374,055</b> |

Both bearing acreage and removals will be updated for the final 2025 total acreage estimate to be delivered in November 2025.

It should be noted that bearing acreage may be adjusted slightly (+/- 1-3%) following summer 2025 removals and ground truthing verification. Any change will mostly likely affect acreage in the 3rd year non-bearing, thus the impact on estimates of overall production volume should be considered negligible.

The tables on the following pages represent a full account of acreage between 2024 and 2025, as well as removals and bearing acreage by county as of April 30, 2025. Bearing acreage and removals by year planted are provided as well.

## INTRODUCTION

Land IQ has provided mapping for the CWB in 2014, 2019, and 2023. The 2024 mapping was the first time there was consecutive mapping.

## APPROACH

Land IQ draws upon on multiple lines of evidence including agronomic and remote sensing knowledge, unique field boundaries, robust on-the-ground verification, customized image analysis, and machine learning algorithms to classify walnut orchards.

For each mapped year, Land IQ performs the following steps:

1. Imagery Acquisition
2. Irrigated Field Boundary Delineation
3. Ground Truthing
4. Remote Sensing Analysis
5. Change Detection and Update

For this first deliverable, determining removals and bearing acreage, Land IQ utilizes the spatial mapping from 2024, in addition to a change detection analysis to determine removals.

## FINAL ESTIMATE

The final acreage will be provided in November and will include:

- Bearing Acreage
- Non-Bearing Estimate
- Total Removed Acreage  
(September 1, 2024 - August 31, 2025)
- Stressed Acreage  
(may not be producing at full potential)
- Abandoned Acreage (considered non-producing)

# 2025 STANDING ACREAGE

## AS OF APRIL 30, 2025

| 2025 Initial Estimate (as of April 30)                                                                  | Initial Estimate | Description                                                                                                                                                                                                                                                      |
|---------------------------------------------------------------------------------------------------------|------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 2024 Standing Bearing Acreage                                                                           | 379,854          | Land IQ 2024 Final Standing Acreage. This includes stressed and abandoned orchards.                                                                                                                                                                              |
| New Bearing Acres Coming into Production                                                                | 8,538            | Previous non-bearing acreage (planted 2021) newly coming into production. Some may not be harvested due to economics.                                                                                                                                            |
| Initial Removed Acreage                                                                                 | 7,486            | Removals mapped between September 1, 2024 and April 30, 2025.                                                                                                                                                                                                    |
| 2025 Initial Standing Bearing Acreage                                                                   | 381,472          | Land IQ 2025 Initial Standing Bearing Acreage. This includes stressed and abandoned orchards. Initial Removed acreage through April 30 has been deducted. Additional removals will occur between May 1, 2025 and August 31, 2025 and this acreage will decrease. |
| 2024 High Stress/Abandoned Acreage Still Standing                                                       | 7,417            | Acreage showing high levels of stress over current or multiple water years. These are less likely to be in production and are removed from "Producing Bearing Acreage Estimate."                                                                                 |
| 2025 Initial Producing Bearing Acreage                                                                  | 374,055          | Initial Standing Acres minus 2024 High Stress/Abandoned Acreage that is still standing.                                                                                                                                                                          |
| 2025 Final Estimate (as of August 30)                                                                   | Final Estimate   | Description                                                                                                                                                                                                                                                      |
| 2025 Removals (Initial: September 1, 2024 through April 30, 2025, Final: September through August 2025) | TBD              | Removals mapped between September 1, 2024 and August 30, 2025. (Initial estimate from September 2024 through April 2025 was 7,486 acres)                                                                                                                         |
| New Bearing Acreage Coming into Production                                                              | TBD              | Previous non-bearing acreage (planted 2021) newly coming into production. Some may not be harvested due to economics.                                                                                                                                            |
| 2025 Total Standing Acreage                                                                             | TBD              | Total standing acreage; includes current 2025 mapping after removals and new estimated non-bearing acreage.                                                                                                                                                      |
| 2025 Non-Bearing Estimate                                                                               | TBD              | Includes mapped non-bearing orchards from 1 to 4 years old, plus an estimate of very young orchards that have not been detected due to immature status. This estimate is developed using mapping, ground truth data and statistical analysis.                    |
| 2025 Bearing Age Acreage                                                                                | TBD              | Total acreage standing with a bearing age, inclusive of stressed and abandoned acreage outlined below.                                                                                                                                                           |
| High Stress, Likely Abandoned Acreage                                                                   | TBD              | High levels of stress over current or multiple water years. Less likely to be in production and were removed from "Producing Bearing Acreage Estimate."                                                                                                          |
| 2025 Final Producing Bearing Acreage Estimate                                                           | TBD              | Estimate of bearing acreage likely in production, omitting higher confidence abandoned and stressed acreage.                                                                                                                                                     |

| Total Producing Standing as of April 30, 2025  |                  |                 |                                           | 374,055          |                 |

\*Reflects standing acreage only. Removals (as of April 30, 2025) and acreage coming into production are included in this number.

\*\*Removals are those observed between September 1, 2024 and April 30, 2025.

Some differences may occur between sheets due to rounding.

Source: Land IQ. California Statewide Walnut Mapping - 2025. Based on data from USDA National Agricultural Imaging Program (NAIP), USGS Landsat, and other private imagery resources.

\*Standing acreage includes high stress/abandoned orchards.

\*\*Initial removals only account for those removed between September 1, 2024 and May 1, 2025. Additional removals will occur between May 1, 2025 and August 31, 2025 and will be reported in November.

<sup>a</sup> Non-bearing is considered years 1-4 (2022-2025). Orchards planted in 2021 are considered bearing in 2025. Orchards planted in 2022 will be considered bearing in 2026. Orchards planted in 2022 are considered fully mapped.

<sup>b</sup> The estimated non-bearing acreages for 2022 - 2025 will be provided in the November estimate.

2025 Standing and Removed Acreage as of April 30, 2025, by Year Planted

|                 | TOTAL            |         |
|-----------------|------------------|---------|
|                 | Bearing Standing | Removed |
| Alameda         | 40               | -       |
| Amador          | 429              | -       |
